

Year One Science: Senses

Braille helps blind people to read.

We use our tongue to taste.

sweet

bitter

salty

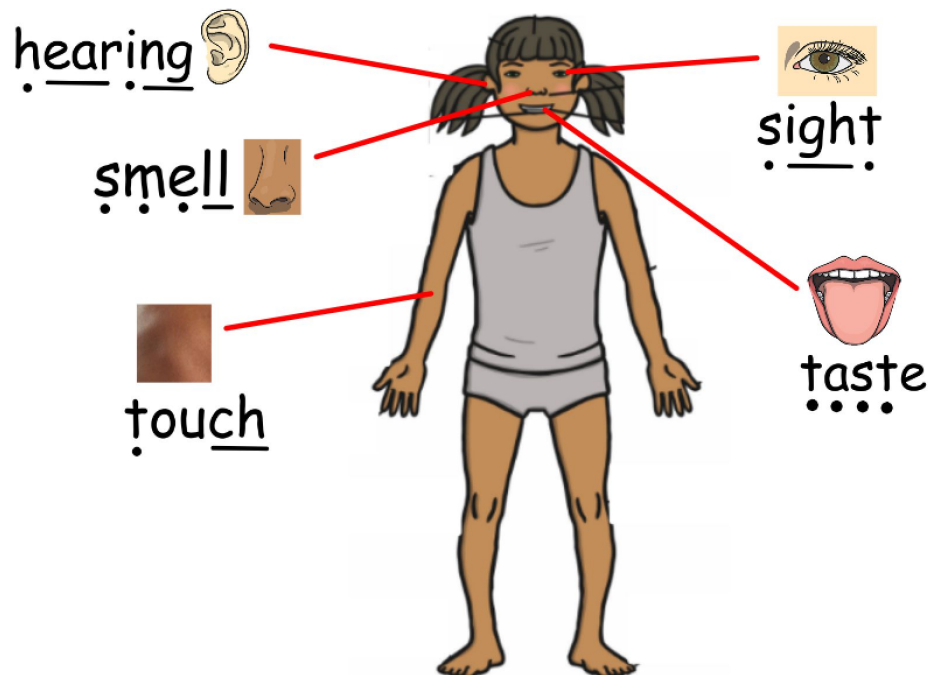

savoury

sour

Our bodily senses

Key vocabulary

senses		Different parts of your body that help you to feel, see, hear, smell and taste the world around you
sight		The sense we use to see
touch		The sense we use to feel, we feel through our skin
taste		An animal that eats other animals
blind		When an animal or person cannot see
deaf		When an animal or person cannot hear

Significant Person

Louis Braille was born in 1905. His blindness led him to develop a way that allows blind people to read and write. This is called braille. It means that blind people can feel the letters with their sense of through through their fingers.

Braille Alphabet
